Company Introduction

Application Space

1

- Ruggedness
- Reliability
- Extended Temperature
- High Availability
- Scalability

Company Introduction

Our Global Footprint – Presence in Asia and Europe

Production

R &D - Engineering

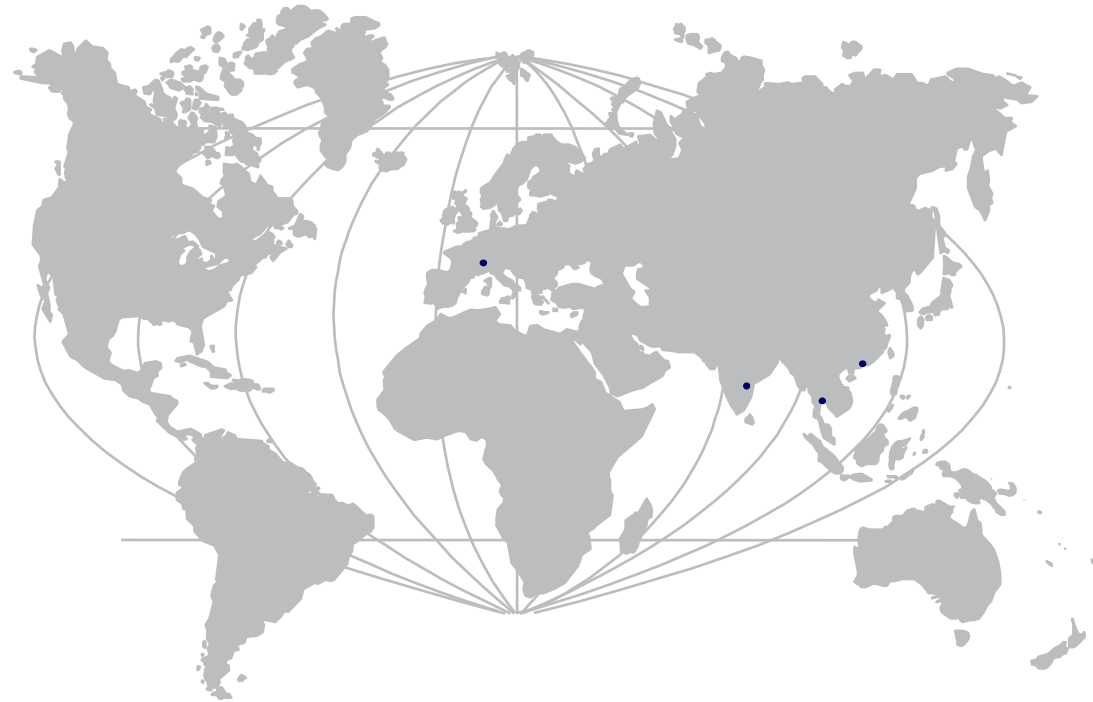

Sales

Logistics

Administration

Lyon -France

Bangalore

Bangkok

Hong Kong (HQ)

DRM28 BUS Dynamic Route Map System

Intelligent Wirelessly Enabled PIS System

**DYNAMIC ROUTE MAP AND
PIS SYSTEM FOR BUSES**

© Dragontech Systems | www.dragontech.hk

DRM28

System Highlights

1. Purpose Built

- Rugged through design - aluminium enclosure with M12-connectors
- All-in-one System - Display, Processor, PSU, I/O, Connectivity
- Capable of HD Animations, video, effects combined with static images
- Power Supply 9-36VDC, with automotive grade filtering and protection
- Wide temperature range -25 to +55°C operating (+70°C for 15 min.)
- CPU clock and backlight thermal throttling
- Event, error logging
- EN50155 certified for ITS installations

2. Integrated

- Dual Core i.MX6 processor for display control and functions
- Ultra-Wide 16:3 aspect ratio LCD with high brightness and contrast
- 28" (1920 x 357 resolution), display area: 698.4 (H) x 129.86(V)
- 10/100/1000Mbit Ethernet, WiFi, Isolated RS-485 Serial, Service USB for maintenance
- Options: GPRS/EDGE/3G modem and GPS, CAN-bus, Audio output, Isolated DIO
- Embedded Linux OS, System Firmware and Display Content Libraries

3. Future Proof

- Internal USB2.0 Expansion slot for optional peripherals
- MiniPCIe expansion to include additional interfaces
- Firmware and Application SW can be upgraded
- DURIGO Device Cloud Platform enables new services and applications

Dynamic Route Map System

Dragontech Solution Advantages

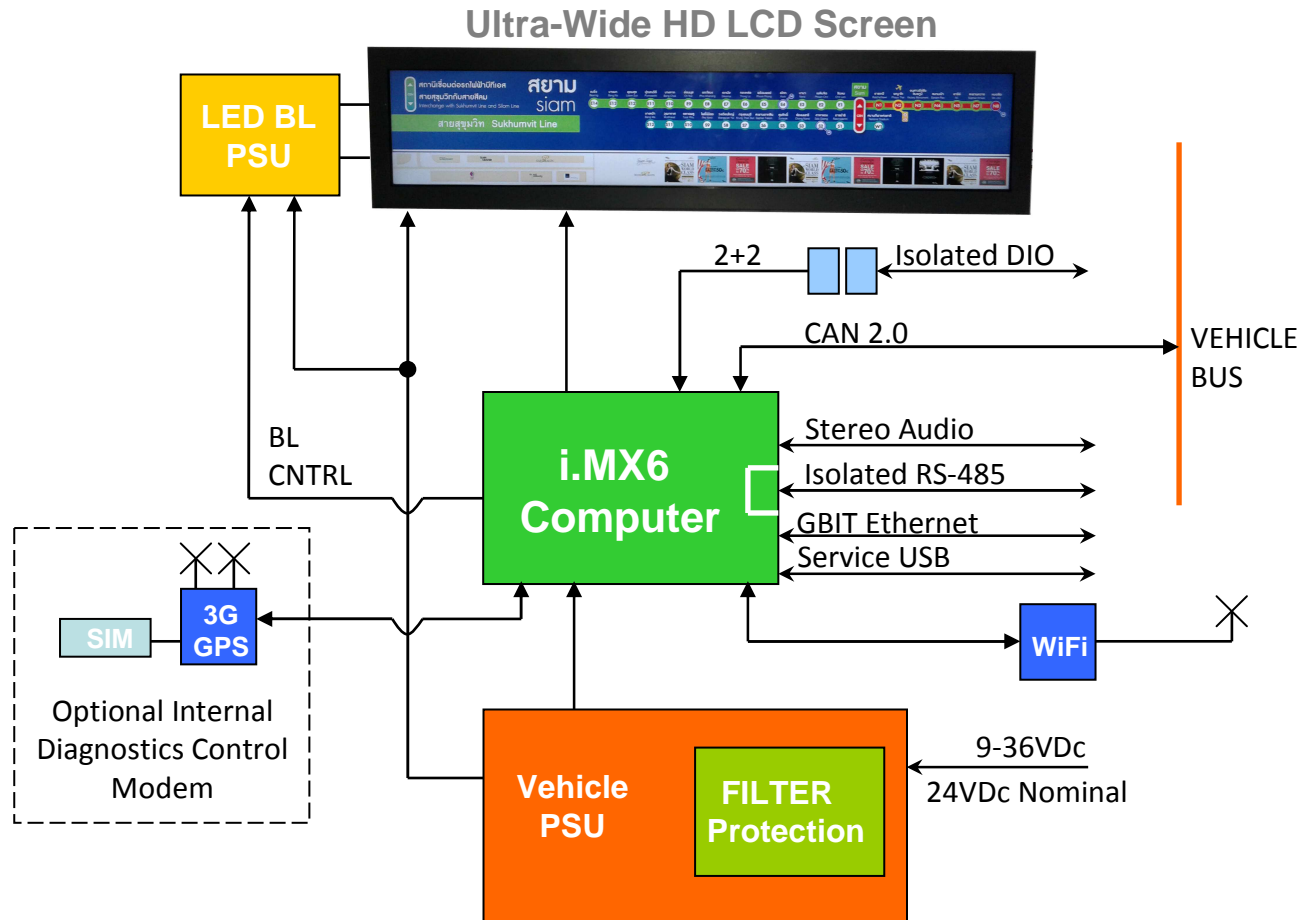

5

- **Each DRMD autonomous**, different content can be shown different displays
- Improved **customer experience**
- **Gateway Mode** (Master and Slaves)
- **Versatile interfaces**: Gbit Ethernet, Isolated RS-485, WiFi for updates
- **Optional 3G modem with GPS** (Gateway Master) remote monitoring, configuration
- Powerful **CPU manages static images, animation, video and changing images**
- Full HD resolution with **no interference from long cables**
- Control of content change managed by **internal CPU and Firmware**
- **Simplified wiring, no ground loops, easy maintenance** – fully isolated system (RS-485)
- **Internal diagnostics**, monitoring, error alert and reporting (Optional 3G modem access)
- **Reduced global cost**
- Easy integration with CAN or other vehicle systems – **ideal for modernization**
- Linux SW, support for creation of **project specific extensions, functions and controls**
- **Certified** for compliance to ITS standards

DRM28 Dynamic Route Map System

Dynamic Route Map Displays

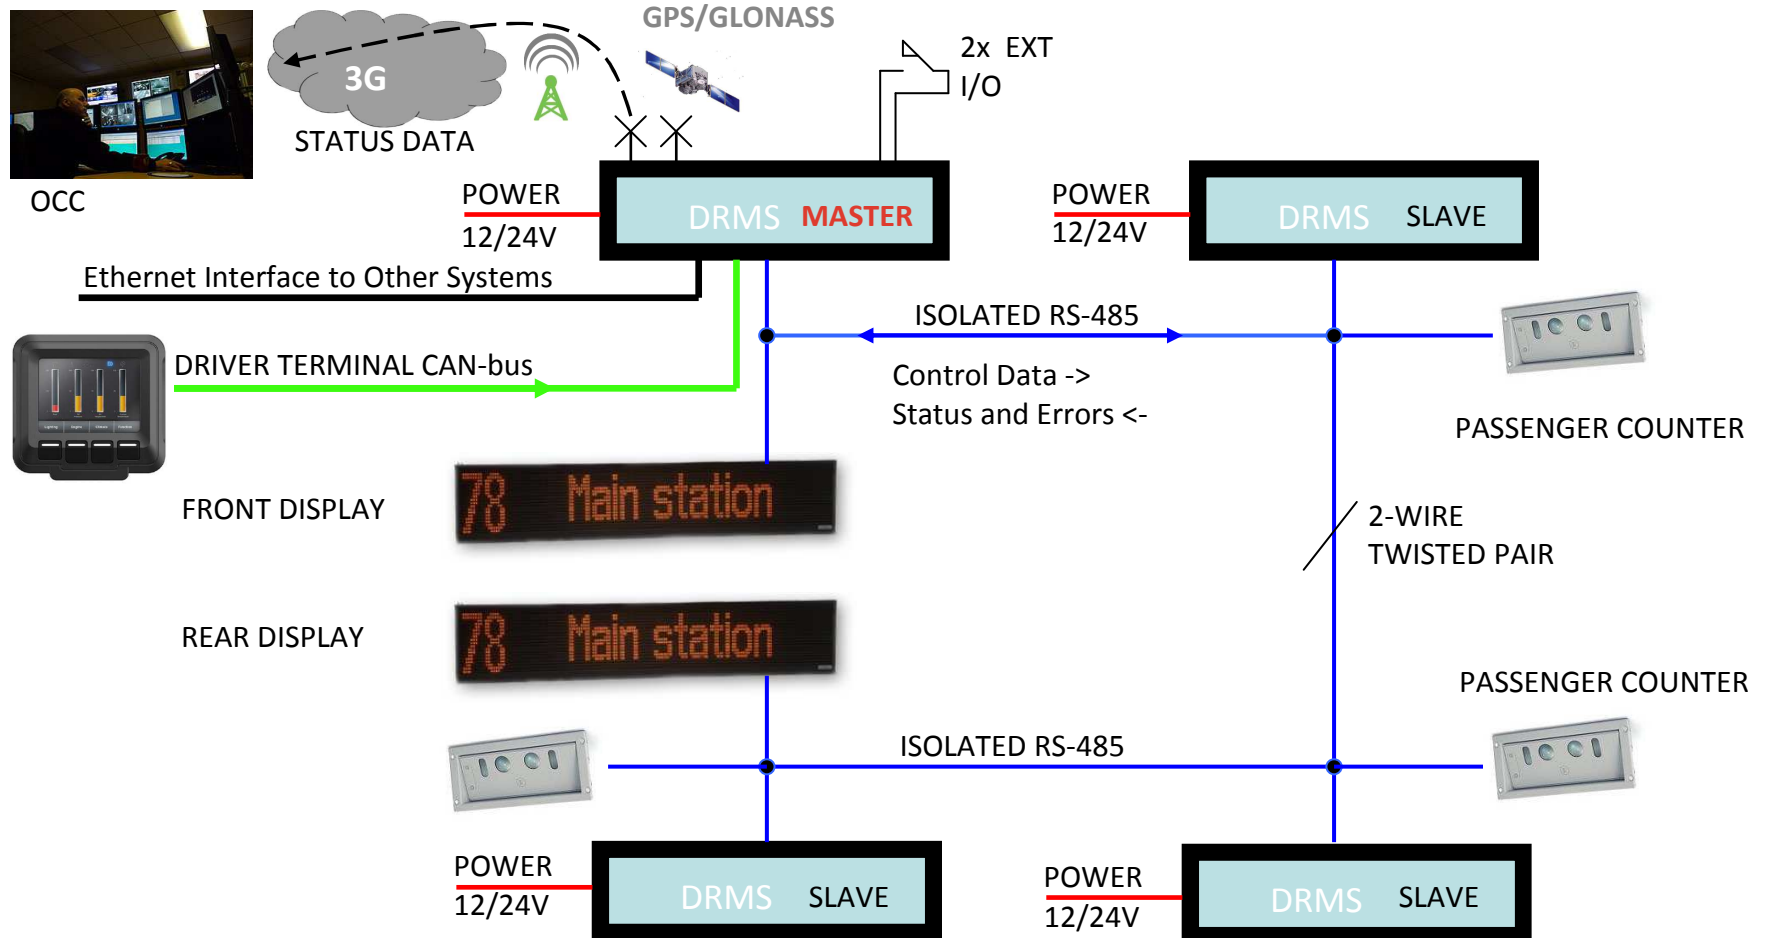

Coach PIS Solution Scenario – Legacy Approach BUS, PC and Displays

Dynamic Route Map System

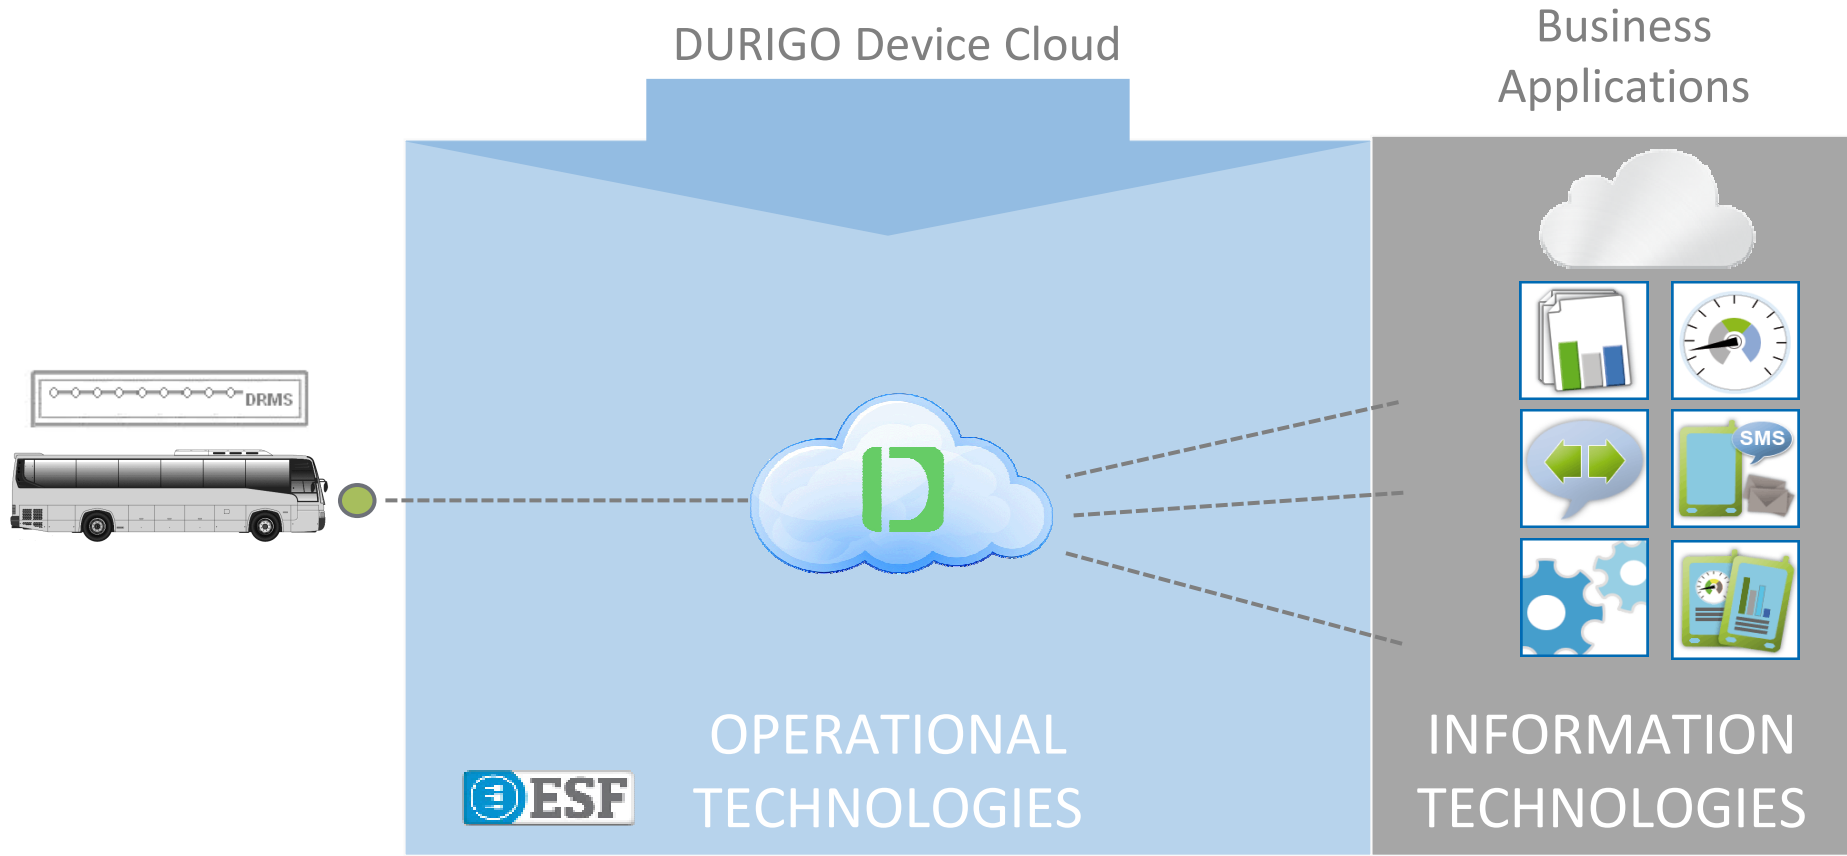

Gateway Mode – Using DRM28 (CAN + RS-485) – NO BUS-PC

DURIGO Systems Integration Platform

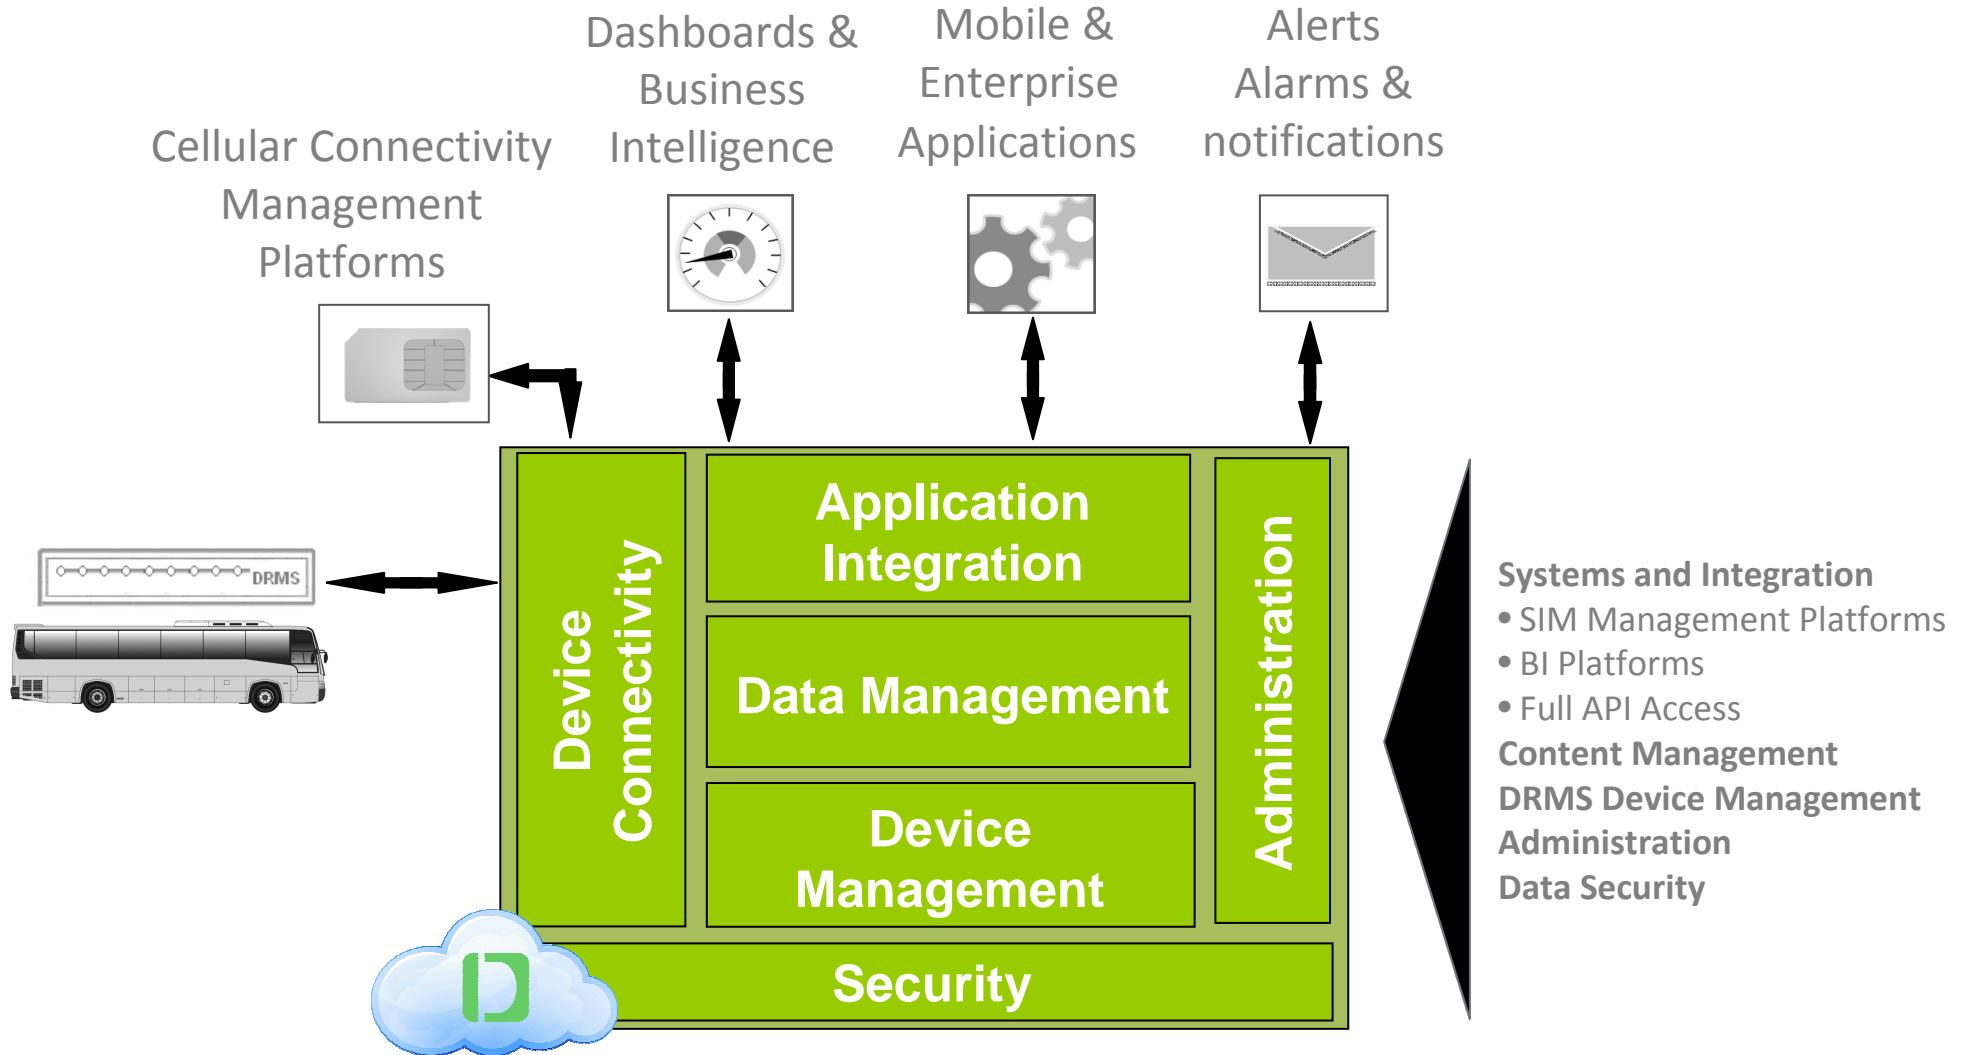

Joining Operational Technologies with IT

DURIGO Systems Integration Platform

Functional Overview

Dynamic Route Map Systems

Software Solution Engineering

11

- Linux Based Firmware Engine
- Display content control, animations development using QT toolchain
- Standard development platform
- Ready to use interface functions
- Functions for backlight control, LCD power ON-OFF, temperature monitoring and system status
- Tested interfaces to onboard signalling systems

- Integration, SW development services available for projects

Systems Engineering and Integration

Successful Project Execution

12

- Custom display sizes and formats 16:3, 16:4.2
- Mechanical customization
- Project software engineering
 - CAN-bus and RS-485
 - Display content
- Project specific OCC and content management systems
- Dynamic Route Map (DRM) application software development services
- Data integration using DURIGO Cloud Platform
- Integration with other onboard systems
- Testing and certification for project specific system
- Maintenance and repair services
